

UIT

University of Integrated Thoughts

(proposed)

Producing well-rounded
graduate with revealed
& acquired knowledge,
generic skills and
human values

Background

The idea behind integrated thought is engaging the human potential through cultivating the 86 billion neurons allotted to each human being – engaging as needed by the demands of the times and situations adrift. This type of learning is also known as Cognitive Learning - an active style of learning that focuses on helping the student learn how to maximize his/her brains potential. It makes it easier for the student to connect new information with existing ideas hence deepening memory and retention capacity. This is opposed to rote learning, i.e., memorizing notes and reproducing in examinations – something that a photocopy machine can do without the support of neurons.

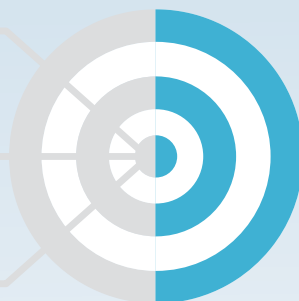

The mission of UIT involves doing research into how cognitive learning takes place and integrating such learning practices into the teaching of existing curriculum subjects. This would include basic mathematics, fundamental physics, basic programming, IT skills and essential soft-skills, i.e., critical thinking, communication, personal and interpersonal skills in addition to integration of revealed & acquired knowledge and good moral/values in the academic curriculum so that student are well-rounded graduate followed by a faithful professional.

Engaging
the 86 billion
neurons allotted
to each created
human being

Developing
the Human
Potential

Vision

- 01 To revive the intellectual heritage of Ummah
- 02 To become A leading center of excellence in all branches of higher education

Co-curricular Activity Centre / Clubs

Phases of the Development Plan

First Phase: 2022-2025

Land Purchase & Foundational Development

Offering certificate, Diploma & Professional Courses

Approval from UGC

Second Phase: 2026-2030

Infrastructural Development

Offering Post-Graduate Academic Program

Collaborative and Partnership Project

Third Phase: 2031-2035

Infrastructural Development

Offering Undergraduate & Post-Graduate Academic Programs

Action Plan: 2022-2031

• Site Selection and Agreement	Feb 2022
• Land Purchase	2023-2025
• Campus Design & Initial Construction	2024-2025
• Industry Research / Partnership Project	2025-2026
• Launch in Post-Graduate Program	2026
• Launch in Undergraduate Program	2031

Viability and Sustainability

- Starts at Own Land /Own Campus, No rental challenge
- Solid Waqf (Endowment) Fund
- UIT Foundation with global partners & Diverse Expertise
- Strong academic community at home & Abroad

Major Event Done in 2022
